And another tool included is channel mixer. This allows to change the brightness of the image. It also has some basic aspects for web design. Many of the functions which are present in a lot of basic photo editors are only present in Photoshop Elements. They include the basics such as cutting, pasting, and adding images to videos. Another feature that is useful is the ability to trim edges. This allows to crop the edges of the image and remove unwanted areas. Mitral valve endocarditis: current trends. A 65-year-old man was referred to our department for mitral valve endocarditis following aortic valve replacement 2 months earlier. A native valve endocarditis was indicated by high fever and aortic regurgitation due to endocarditis of the native aortic valve. Two recurrences of a native valve endocarditis have occurred. Mitral valve prosthesis endocarditis was indicated by mitral regurgitation due to endocarditis of the prosthetic mitral valve. Two recurrences of prosthetic valve endocarditis have occurred. The initial 4 cases of native valve endocarditis involved male patients, and all of the patients were younger than 60 years. The 2 other patients are aged 78 and 84 years. Prosthetic valve endocarditis occurred in 2 men and 1 woman. Four patients underwent a repeat operation; 2 were treated conservatively, and two patients underwent surgery. The factors that predispose the elderly to endocarditis are the altered immunologic status and higher incidence of other medical problems. These patients have much higher morbidity and mortality rates.

Optical rotation studies on (2S,4R) and (2R,4S)-2-hydroxy-4-phenyl-2-methyl-pentan-3-one. The optical rotation of the -(+)-enantiomer of (2S,4R) and (2R,4S)-2-hydroxy-4-phenyl-2-methyl-pentan-3-one was measured. Both compounds have been reported to occur in all members of the Asariaceae, including the long-time host plant, *Musa sapientum* L. The values for (2S,4R) and (2R,4S)-2-hydroxy-4-phenyl-2-methyl-pentan-3-one are +81.4 and +30.1 degrees, respectively. Neither of the (2S,4R) nor the (2R,4S)-2-hydroxy-4-phenyl-2-methyl-pentan-3-one enantiomers, however, could be found in the fibrous roots of *M. sapientum*.

In a move that confirms rumors about what we already knew, ASUSports.com has confirmed the signing of North America's first Amateur Goalie, Austin Smith. The freshman spent the last two years playing Junior under the coaching of John Hegarty at the ANCHOR Baseball Academy in Dallas. The 6-foot-2, 178-pound lefty is committed to defending collegiate opponents. According to ASUNews, the Omaha native will redshirt as a true freshman and be eligible to play immediately as a sophomore. It's hard to be mad at that, or that he has a commitment to Omaha's Bishop Heelan HS. Smith has already had a great effect on the game of goaltending. A product of the U-16 and U-18 developmental programs with the Arizona Stars, the talented clogger has garnered All-USA (West), All-Arizona, and All-Arizona Player awards for his play in goal. Smith is the 15th overall recruit in the class and is a bit more of a gem than most. His size, shot-blocking ability, and desire are special. It will be interesting to see how much playing time he gets in his first season at the college level. In five seasons with the Stars, he has a 2.28 goals against average and .924 save
