The ability to experiment with novel forms of image content is now in the palm of your hand. The new Content-Aware Fill option lets you quickly clean up your images by automatically finding and replacing pixels of the same color. That means you no longer have to rely on Photoshop's Magic Wand tool to retouch patches of similar color. Now with Content-Aware Fill you can also correct or slightly tweak a color's tone by overlapping a layer that contains the similar color and in doing so automatically adjust the MCU measurement to help you create greater consistency across consecutive photographs. The new Draft and Live View features allow you to edit multiple images in real time, while the Monochrome adjustment can be combined with Adjustment Layer effects, colors, and even masks. You can also easily tag images and groups, add keywords, filter the current project, or generate and print project reports at a glance. All-new Flyover mode allows you to explore what you're creating without having to download any assets. Slideshow Builder automatically compiles your finished images into a compelling slideshow without tedious adjustments. Bring your favorite photos to life using one of Photoshop's new artistic filters. They include Little Pixels, which rescales all or part of an image so the pixels become twice as small and five times as large, resulting in an entirely surreal image. Artificial Pixels drops the size of each pixel by 50% and adds bright color to simulate hot pixels and other imperfections.

There's more to the computer than just running Photoshop. Photoshop should never be used as a crutch; you should treat it like any other tool in your creative arsenal when you're working. Photoshop will only work within limits, and you have to learn how to overcome those limitations to truly be able to use your images the way they should be used. Ground yourself in understanding the limits of the tools in Photoshop and everything else will be easier to plan and create. Picking a good monitor is an essential part of a digital artist's setup.
